

# Nature Watch

## The very best in nature interpretation

Nature Watch was first introduced in 1995 to provide a range of inexpensive interpretation panels for conservation bodies, countryside rangers and reserve wardens. Since then, the range has grown enormously and has been embraced by a wide variety of organisations who have dedicated areas of land for nature and who wish to provide an extra dimension of interest for their visitors.

## Perfect for all natural sites

Nature Watch panels have become a popular feature in nature reserves, country parks, picnic areas, nature trails and footpaths, school and college grounds, caravan parks, golf courses, farm and rare breed parks, village greens, gardens and even around industrial and business sites - they are perfect for any location where wildlife and people come together.

More than 400 different wildlife species covered (and counting)

Nature Watch Panels

Sizes: 295 x 95mm & 295 x 285mm.

An extra dimension of interest for visitors

Helps explain the workings of nature

Aids wildlife recognition

Promotes ecological awareness

Suitable for all age groups

Fully weather proof

vandal resistant

All panels and signs are produced in tough, 5mm thick, vandal resistant PETG. They are fully weather proof and suitable for longterm outdoor use.

Nature Watch Plus are double sized panels on a diversity of topics

Panel size: 600 x 285mm

Range of sturdy treated timber mounts  
Columns & lecterns

Nature Watch now includes over 400 different wildlife panels, along with a range of co-ordinating visitor management signs. They can be used individually or in combination and are easily mounted - they can be drilled and screwed or, better still, displayed in one of our specially designed mounts which set the panels off to their best advantage and allow interchangeability to cope with seasonal variations.

The range of mounts can be used individually or in modular form. They are manufactured in pressure-treated timber for low maintenance and a natural appearance.

All sizes are approximate. Posts are extended to allow for fitting into the ground. Each square signifies the space for one Nature Watch panel or three visitor management signs.

The Osprey Company reserves the right to alter specifications at any time.
